Read the following passage and then answer the questions.

Marriage is often not easy. Maybe man and woman love each other, but they *argue*. They get angry. Later they apologize, but it happens again and again. What's the problem? Are men and women really very *different*?

Deborah Tannen says yes, men and women are very different. Tannen teaches at Georgetown University in Washington, D.C. *She* writes books about the ways people talk. She believes that men and women talk- and think- in different ways. She tells about some differences in her book, *You Just Don't Understand*.

The differences, Tannen says, begin when men and women are children. Very young boys and girls are similar to each other. In other words, *they* like many of the same things and play in the same ways. They aren't very different. But then there is a change. When children in the United States are five or six years old, boys usually play in large groups. One boy gives *orders*. For example, he says, "Take this," "Go over there". *He* is the leader. Boys also *brag*. In other words, they say good thing about themselves. But girls *there* usually play in small groups or with one other girl. A girl's best friend is her very good friend and important to her. Girls often don't give orders; they give suggestions.

Read the following passage and then answer the questions.

Many people wonder: Why do we sleep? Why do we dream? They ask themselves the purpose, or reason. There are many theories, or opinions about this, but scientists don't know if these ideas are correct.

One theory of sleep says that during the day, we need sleep to make new chemicals and repair, or fix, our bodies. This theory is called the "Repair Theory". One piece of evidence for this theory is that our bodies produce more of growth hormone while we sleep.

Another theory is that the purpose of sleep is to dream. Dreaming occurs only during one stage, or period, of sleep (Rapid Eye movement- REM) sleep. REM sleep occurs about 90 minutes and last for about 20 minutes. Some scientists believe that REM sleep helps us to remember things, but others don't believe and don't agree.
