Add-on Lecture 2

Quantitative Research : we deal with numbers.

Qualitative Research : we deal with data , explanation of data etc

Classical Report of Research

Abstract - Introduction - Literature Review - Methods - Data Analysis - Results - Discussion - Conclusion - Bibliography - Appendices

^^ these 10 items is the traditional way to presenting Research.

*It's can be presented as a chapter in our Research or as a section

ightarrow it depend on our Research type

→There is different types of research (<u>Dissertation Theories</u> – <u>Articals</u>)

We find them in doctoral message + it's longer than Articals.

We find them in journals and online sometimes + it's very short and specific

*the 10 Items will be as a sections in Articals , and as a chapter in dissertation theories.

*we can put (Data Analysis - Results - Discussion) in one chapter , depending on their lengthy.

Abstract :

- It's not get chapter for itself (why??) cause it is only one page or less .
- We find it in the beginning of the articals , dissertations and theories Research.
- It's like a summary of Research but although we put the Abstract in the beginning of Research it's not going to be written until to very end of your Research (why??) because in Abstract we write the result of our Research.

Introduction :

- We can put it in chapter (in dissertation or theories) or we can put it in section (in Articals) or in term paper (it's shorter than articals).
- In Introduction we introduce the problem and the topic of our Research , is it significant for ourselves or society or to other people around the word.

There are 4 categories of Research :

Theories	Dissertation	Articals	Term paper "Assignment"
longest	Long	Short	Shortest

Literature Review :

- It's important when you write this chapter , you must write it in your own way and you should avoid the plagiarism (steal other's text).
- In Literature Review you going to read about your topic , the previous studies , similar to your study and then report it in your own words (not copy & past).

Methods : How are you doing your Research ?!

Data Analysis : After you gather all your data ; you must analyze it.

Results :

After you analyze your data = you have result or maybe enumerate result that you need select the important of them but if you have few result you can report it all and present them in very interesting way.

Conclusion :

- If our Research is very lengthy then we need put the Conclusion .
- It's summary about the Research and to remind readers what we have done through the Research.

Bibliography :

- You give us the list of books and articals.
- You use special way to present it (AB style)

Appendices :

- It's contains copies of questionnaires and interviews that you used in your Research .
- You can append in the end of your research Questionnaires , interviews , pictures, graphs, extra information's that useful to your research.

The End ..
