

Please choose the best item:

(1) Psycholinguistics is an interdisciplinary field, this means that:

- (a) it is not linked to other fields in linguistics
- (b) it is linked to other fields in linguistics
- (c) it is an established discipline in linguistics
- (d) None of the above is true

(2) Which of the following is not studied in psycholinguistics?

- (a) Language production
- (b) Language perception
- (c) How language is represented in the brain
- (d) Why some people have more sense of humour than others

(3) Language combines ..... and meaning.

- (a) pairs
- (b) signal
- (c) morphemes
- (d) semantics

Errors result from lack of linguistic.....

- (a) competence
- (b) signals
- (c) meaning
- (d) performance

provides instructions on how a certain

- (a) pairs
- (b) signal
- (c) morphemes
- (d) semantics

(4) Errors result from lack of linguistic.....

- (a) competence
- (b) signals
- (c) meaning
- (d) performance

(5) ..... provides instructions on how a certain law

- (a) Signal
- (b) Sign language
- (c) Prescriptive grammar
- (d) Descriptive grammar

(6) In ..... , linguists observe the language  
document it.

- (a) descriptive grammars
- (b) prescriptive grammars
- (c) linguistic competence
- (d) linguistic performance

- (7) ..... is the use of linguistic knowledge in the production of language
- (a) reading
  - (b) listening
  - (c) linguistic competence
  - (d) linguistic performance
- (8) Mistakes result from lack of linguistic .....
- (a) competence
  - (b) meaning
  - (c) signals
  - (d) None of the above is true
- (9) Language processing is subconscious because ....
- (a) animals cannot speak
  - (b) it operates without the mental faculties fully active
  - (c) language is spoken by children
  - (d) the eye moves smoothly as someone is reading a text
- (10) Language processing is...
- (a) mind-internal
  - (b) mind-external
  - (c) not mind-internal nor external
  - (d) operated by the tongue
- (11) Psycholinguists anticipate unseen language processing by analysing:
- (a) the speech of children
  - (b) sign language
  - (c) the speech of elderly people
  - (d) the observable linguistic behaviour
- (12) To show where words and phrases are stored in the brain, psycholinguists
- (a) use MRI scans
  - (b) conduct open-skull surgeries
  - (c) have no option but to observe peoples' linguistic behaviour
  - (d) use mind-maps
- (13) One way to observe linguistic behaviour is by analysing:
- (a) the size of someone's head
  - (b) the physical fitness of speakers
  - (c) Slips of the tongue
  - (d) The colour of someone's tongue

سلسلة انجليزية مبكرة

Slips of the tongue involve

- (a) Making fun of someone's mistakes
- (b) Lack of linguistic competence
- (c) Exchanging morphemes within a sentence
- (d) Not understanding someone's intended meaning

Slips of a tongue happen when there is a/an:

- (a) difference between someone's intended and produced utterance
- (b) similarity between what someone has planned to say and what is said
- (c) misunderstanding of a sentence
- (d) accurate perception of utterances

Psycholinguists:

- (a) do not pay much attention to spoonerisms
- (b) make fun of people's spoonerisms
- (c) learn from peoples' spoonerisms
- (d) teach people to produce spoonerisms

Lexical entries are organised ..... in the brain

- (a) according to their meaning and sound
- (b) alphabetically
- (c) according to length of the word
- (d) chronologically

(18) The tip of the tongue phenomenon means:

- (a) being unable to remember words due to head injury
- (b) being unable to produce words due to head injury
- (c) remembering some details about a word, but not the word itself
- (d) remembering the meaning of a word in short-term memory

(19) The tip of the tongue phenomenon tells us about:

- (a) how lexical entries are organised in the mind
- (b) how the mind recognises lexical entries
- (c) both (a) and (b)
- (d) None of the information found in (a) and (b) above.

(20) Lexical entries are stored in the mind as

- (a) a complex network of lexemes
- (b) independent words
- (c) a list of vocabulary items organised alphabetically
- (d) None of the previous

A

- (21) Lexical decision experiments are used to:
- (a) help us understand how lexical entries are linked to each other
  - (b) know how people access lexical entries stored in their brains
  - (c) how quickly and accurately do people access their lexical entries
  - (d) all of the previous choices are correct
- (22) In lexical decision experiments, participants:
- (a) choose the best meaning for a given word
  - (b) decide whether a word is a real word or not
  - (c) decide on how a word can be put in context
  - (d) tell whether or not they have come across a given lexical entry
- (23) Response latency is:
- (a) the time it takes the participant to complete the experiment
  - (b) whether or not the participant has provided the right answer
  - (c) both (a) and (b)
  - (d) None of the previous
- (24) Response accuracy is:
- (a) the time it takes the participant to complete the experiment
  - (b) whether or not the participant has provided the right answer
  - (c) both (a) and (b)
  - (d) None of the previous
- (25) Frequency effect means:
- (a) frequently used words are accessed faster than less common ones
  - (b) frequently used words are accessed the same as less common ones
  - (c) less frequently used words are accessed faster than common ones
  - (d) None of the previous
- (26) Priming is a lexical decision experiment in which participants are:
- (a) given more time to complete the experiment
  - (b) given less time to complete the experiment
  - (c) given a related word before the stimulus
  - (d) between the age of 10 and 15.
- (27) Language is species specific, this means:
- (a) Animals cannot use language to communicate with humans
  - (b) Humans can use language to communicate with humans
  - (c) Animals can use language to communicate with humans
  - (d) Both (a) and (b).

A

السؤال رقم ١٢٣/١٢٤

-٤٠١٧٥

Language is universal, because

- (a) human babies are genetically prepared to acquire language
- (b) all human languages have universal properties
- (c) both (a) and (b).
- (d) None of the above

The critical period is

- (a) an age restriction for acquiring the first language
- (b) a period in adolescence in which people start to think critically
- (c) a decrease in linguistic abilities due to getting older
- (d) none of the above

Language development is triggered by the environment, this means:

- (a) people born in the summer acquire their first language quicker
- (b) people born in the winter acquire their first language quicker
- (c) the environment does not have an effect on language acquisition
- (d) the environment stimulates language acquisition

(31) Neurolinguistics is the study of:

- (a) the representation of language in the brain
- (b) the study of human sound-waves
- (c) the study of language acquisition development
- (d) None of the above

(32) Aphasia is .....

- (a) a language impairment following an injury in the ear
- (b) a language impairment following an injury in the brain
- (c) a language impairment following an injury in the tongue
- (d) a language impairment following an injury in the uvula

(33) Broca's aphasia is also known as

- (a) Non-fluent aphasia
- (b) Fluent aphasia
- (c) Temporal lobe
- (d) Frontal lobe

(34) Wernicke's aphasia is also known as

- (a) Non-fluent aphasia
- (b) Fluent aphasia
- (c) Temporal lobe
- (d) Frontal lobe

صحيح (٥) من ١١

- (35) Broca's area is located in the  
(a) Temporal lobe of the right hemisphere of the brain  
(b) Frontal lobe of the right hemisphere of the brain  
(c) Temporal lobe of the left hemisphere of the brain  
(d) Frontal lobe of the left hemisphere of the brain
- (36) Wernicke's area is located in the  
(a) Temporal lobe of the right hemisphere of the brain  
(b) Frontal lobe of the right hemisphere of the brain  
(c) Temporal lobe of the left hemisphere of the brain  
(d) Frontal lobe of the left hemisphere of the brain
- (37) The brain's control of the body is contra-lateral, this means:  
(a) The right hemisphere of the brain controls the left side of the body  
(b) The left hemisphere of the brain controls the left side of the body  
(c) The right hemisphere of the brain controls the right side of the body  
(d) All of the above
- (38) Language Acquisition Device (LAD) is:  
(a) A computer software which helps people acquire a second language  
(b) A computer software which helps people acquire a first language  
(c) A computer software which helps people language impairments  
(d) None of the above
- (39) There is evidence that human's sensitivity to language can start  
(a) even before birth  
(b) at the age of 6 months  
(c) at the age of 8 months  
(d) at the age of 12 months
- (40) Most children start to discriminate many phonemic contrasts in their:  
(a) First year of life  
(b) Second year of life  
(c) Third year of life  
(d) Fourth year of life

- الحلقة الثانية  
الفصل الأول ١٤٢٥/١٢٣

(41) The holophrastic stage is

  - a stage of early acquisition in which the child produces random sounds
  - also known as the one-word-stage of acquisition
  - a stage in which the child produces two consecutive words
  - none of the above

(42) During pre-school years, the child acquires an average of

  - 1 to 2 new words everyday
  - 1 to 4 new words everyday
  - 4 to 8 new words everyday
  - 8 to 12 new words everyday

(43) Code-switching is

  - The child's ability to acquire more than one language simultaneously
  - The child's transition between language acquisition stages
  - The speaker's switching between two languages in one discourse
  - The ability of bilingual speakers to speak more than one language

(44) The first stage in planning speech, after the idea is made, is

  - Building simple sentence structure
  - Building complex structure
  - Creating agreement relations
  - Accessing the lexicon

(45) A word can be retrieved using:

  - Meaning
  - Sound
  - Both
  - None of the above

(46) Grammatical encoding is:

  - The creation of sentence structure during planning
  - The production of a sentence
  - The perception of vocabulary items
  - The perception of sentences

(47) Contextual information help us perceive information in what is known

  - Bottom-up information
  - Surface structure
  - Deep information
  - Top-down information

X 200 14/11/2019 11:11 AM - small

Ques 50 Morpheme mapping is:

- (a) Adding morphemes to a noun
- (b) Adding morphemes to a verb
- (c) Adding morphemes to an adjective
- (d) None of the above

Ques 51 Cohort is:

- (a) All other words that share an initial sequence of phonemes
- (b) All other words that share an initial sequence of morphemes
- (c) All other words that share an initial sequence of graphemes
- (d) None of the previous

Ques 50 Decoding the acoustic signal is known as:

- (a) Bottom-up information
- (b) top-down information
- (c) Deep information
- (d) Surface structure

Ques 51 The orthography of a language is its:

- (a) phonetic system
- (b) grammatical system
- (c) writing system
- (d) text direction

Ques 52 Which of the following is an impossible non-English word?

- (a) Croy
- (b) Trumpet
- (c) Cray
- (d) Crifver

Ques 53 Which of the following is a possible non-English word?

- (a) cat
- (b) fat
- (c) hat
- (d) yat

Ques 54 Pronominal relatives are:

- (a) predicates in a discourse
- (b) pronouns referring to noun phrases
- (c) copular elements
- (d) None of the above

(55) The direct input to the parser is:

- (a) A set of sentences
- (b) A set of morphemes
- (c) A set of words organised linearly
- (d) A hierachal set of words

(56) A word's neighbourhood consists of:

- (a) all the lexical items that are phonologically similar
- (b) all the lexical items that are next to each other in a sentence
- (c) all the lexical items learnt at early stages of childhood
- (d) None of the above

lace

ce

(57) While perception, the parser:

- (a) plans the for the next turn in a conversation
- (b) breaks down complex sentences to simpler sentences
- (c) both (a) and (b)
- (d) Not (a) nor (b)

(58) The brain responds to morpho-syntactic violations:

- (a) differently
- (b) the same as correctly formulated utterances
- (c) quickly
- (d) None of the above

(59) Structural ambiguity is:

- (a) Two sentences with the same meaning
- (b) Two sentences with different meanings
- (c) One sentence that has one meaning
- (d) One sentence that has more than one meaning

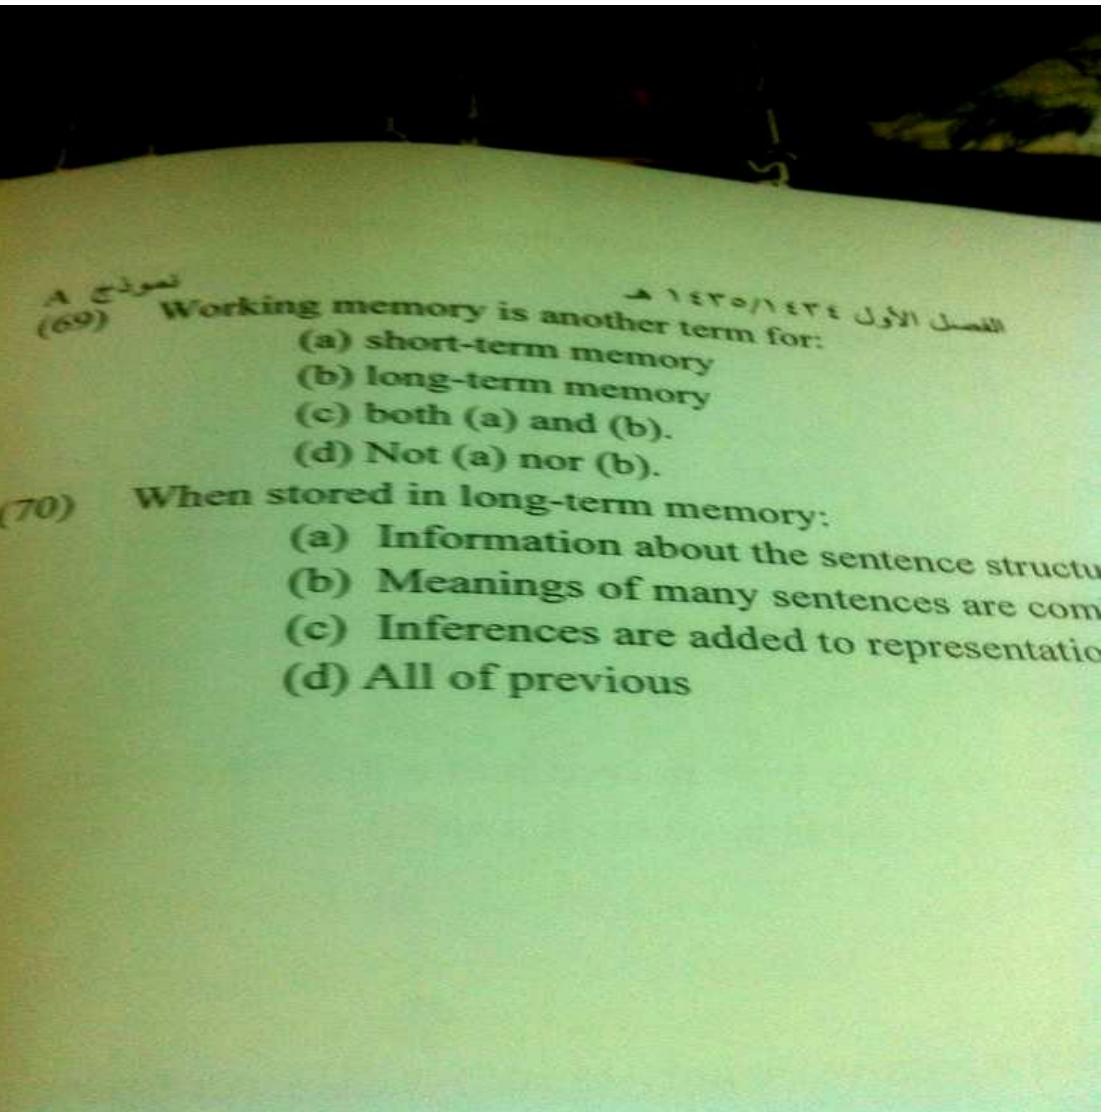

(60) Which of the following is ambiguous:

- (a) I saw a man. He was tall.
- (b) I saw a tall man.
- (c) I saw a man with a binocular
- (d) None of the above

(61) Usually, an ambiguous sentence can be disambiguated when it is:

- (a) put into context
- (b) read more than once

- مختبر لغة انجليزية ٢٠١٣/٢٠١٤
- الكلمات
- A. سؤال
- (62) The parser computes relationships between words
- (a) Rapidly
  - (b) Efficiently
  - (c) Both (a) and (b).
  - (d) Not (a) nor (b)
- (63) The parser prefers:
- (a) Simple structures
  - (b) Complex structures
  - (c) Structures which have already been heard
  - (d) Newly heard structures
- (64) In psycholinguistics, fillers are:
- (a) Constituents of a sentence which were moved into a different place
  - (b) The space left after the constituents have been moved
  - (c) Both (a) and (b)
  - (d) Not (a) nor (b)
- (65) In psycholinguistics, gaps are:
- (a) Constituents of a sentence which were moved into a different place
  - (b) The space left after the constituents have been moved
  - (c) Both (a) and (b)
  - (d) Not (a) nor (b)
- (66) The term discourse means
- (a) Speech production
  - (b) Speech perception
  - (c) Sets of sentences which are connected to each other
  - (d) Sets of sentences which are not connected to each other
- (67) Which of the following determine/s the amount of knowledge necessary for successful engagement in a discourse?
- (a) Topic
  - (b) Participants
  - (c) Context
  - (d) All of previous items
- 8) An anaphoric reference is someone or something that:
- (a) is not important in discourse
  - (b) is extremely important in discourse
  - (c) has been mentioned earlier in a discourse
  - (d) that has never been mentioned earlier in a discourse

حاولت قدر الامكان اني اوضحها ولكن هذا الي قدرت عليه

وعاد نبی الهمه في الحل

وأتمنى من الله لي ولكم التوفيق

اخوكم / ابو ريماس
