

1) Rashid was _____ football player in the team.

- tallest
- the taller
- **the tallest**
- taller

2) Speaking Chinese is ____ writing Chinese.

- easy
- **easier than**
- the easiest
- hardest than

3) One of the following words begins with a prefix: _____

- **unreasonable**
- play
- write
- read

4) We add the suffix _____ to the word (individual) to change it into a verb.

- ation
- cal
- **ize**
- ese

5) The part speech of the word (aggressively) is : _____

- Verb
- Noun
- **Adverb**
- Adjective

6) Arab students are known of their <u>sagacity</u>. They are really smart. What does (sagacity) probably mean?

- sleepiness
- **wisdom**

- thoughtlessness
- negligence

7) In Syria, there are <u>fatalities</u> and wounded people. What does “fatalities” mean?

- winner
- **victims**
- those who are fat
- teachers

8) When you travel around airports, one person will stop by and ask you (How _____ items of luggage do you have, Sir?)

- **Many**
- Much
- A lot of
- Number

9) Nowadays, people feel sorry as they don't have great _____ time to sit with their friends and families.

- Number Of
- Deal of
- Many
- **much**

10) How _____ piles of billions of dollars are spent, over there, on spaceship? السؤال مشكوك فيه ع أساس كلمة (pile كومة) لا تجمع و (piles اسم مرض) و على حسب القاعدة أي شي مجموع بـ s نختار many

Many -

- some
- much
- quite a few

11) _____ is in the truck? my son.

- **who**
- what
- whose
- how

12) _____ is the key? on the desktop.

- why
- which
- when
- **where**

13) _____ did you landed? At 11 o'clock

- where
- how far
- how long
- **when**

14) الأسئلة التالية 14 << 36 تخص قطعة _ اضغط على أيقونة الصورة بجانب السؤال The main idea of paragraph one is:

- Scientists are worried about New York City
- **Logging is destroying the rainforests** -
- Governments make money from logging
- Salmon are an endangered species

Every second, one hectare of the world's rainforest is destroyed. That's equivalent to two football fields. An area the size of New York City is lost every day. In a year, that adds up to 31 million hectares -- more than the land area of Poland. This alarming rate of destruction has serious consequences for the environment; scientists estimate, for example, that 137 species of plant, insect or animal become extinct every day due to logging. In British Columbia, where, since 1990, thirteen rainforest valleys have been clear-cut, 142 species of salmon have already become extinct, and the habitats of grizzly bears, wolves and many other creatures are threatened. Logging, however, provides jobs, profits, taxes for the government and cheap products of all kinds for consumers, so the government is reluctant to restrict or control it.

Much of Canada's forestry production goes towards making pulp and paper. According to the Canadian Pulp and Paper Association, Canada supplies 34% of the world's wood pulp and 49% of its newsprint paper. If these paper products could be produced in some other way, Canadian forests could be preserved. Recently, a possible alternative way of producing paper has been suggested by agriculturalists and environmentalists: a plant called hemp.

Hemp has been cultivated by many cultures for thousands of years. It produces fiber which can be made into paper, fuel, oils, textiles, food, and rope. For centuries, it was essential to the economies of many countries because it was used to make the ropes and cables used on sailing ships; colonial expansion and the establishment of a world-wide trading network would not have been feasible without hemp. Nowadays, ships' cables are usually made from wire or synthetic fibers, but scientists are now suggesting that the cultivation of hemp should be revived for the production of paper and pulp. According to its proponents, four times as much paper can be produced from land using hemp rather than trees, and many environmentalists believe that the large-scale cultivation of hemp could reduce the pressure on Canada's forests.

15) How many species of salmon have become extent in BC?

- 27
- 31

- 137

- 142

Every second, one hectare of the world's rainforest is destroyed. That's equivalent to two football fields. An area the size of New York City is lost every day. In a year, that adds up to 31 million hectares -- more than the land area of Poland. This alarming rate of destruction has serious consequences for the environment; scientists estimate, for example, that 137 species of plant, insect or animal become extinct every day due to logging. If these paper products could be produced in some other way, Canadian forests could be preserved. Recently, a possible alternative way of producing paper has been suggested by agriculturalists and environmentalists: a plant called hemp.

Hemp has been cultivated by many cultures for thousands of years. It produces fiber which can be made into paper, fuel, oils, textiles, food, and rope. For centuries, it was essential to the economies of many countries because it was used to make the ropes and cables used on sailing ships; colonial expansion and the establishment of a world-wide trading network would not have been feasible without hemp. Nowadays, ships' cables are usually made from wire or synthetic fibers, but scientists are now suggesting that the cultivation of hemp should be revived for the production of paper and pulp. According to its proponents, four times as much paper can be produced from land using hemp rather than trees, and many environmentalists believe that the large-scale cultivation of hemp could reduce the pressure on Canada's forests.

31) "Logging, however, provides jobs, profits, taxes for the government and cheap products of all kinds for consumers, so the government is <u>reluctant</u> to restrict or control it." What does "reluctant" mean?

- doesn't want to
- is not allowed to
- would like to
- none is true

Every second, one hectare of the world's rainforest is destroyed. That's equivalent to two football fields. An area the size of New York City is lost every day. In a year, that adds up to 31 million hectares -- more than the land area of Poland. This alarming rate of destruction has serious consequences for the environment; scientists estimate, for example, that 137 species of plant, insect or animal become extinct every day due to logging. In British Columbia, where, since 1990, thirteen rainforest valleys have been clear-cut, 142 species of salmon have already become extinct, and the habitats of grizzly bears, wolves and many other creatures are threatened. Logging, however, provides jobs, profits, taxes for the government and cheap products of all kinds for consumers, so the government is reluctant to restrict or control it.

Much of Canada's forestry production goes towards making pulp and paper. According to the Canadian Pulp and Paper Association, Canada supplies 34% of the world's wood pulp and 49% of its newsprint paper. If these paper products could be produced in some other way, Canadian forests could be preserved. Recently, a possible alternative way of producing paper has been suggested by agriculturalists and environmentalists: a plant called hemp.

Hemp has been cultivated by many cultures for thousands of years. It produces fiber which can be made into paper, fuel, oils, textiles, food, and rope. For centuries, it was essential to the economies of many countries because it was used to make the ropes and cables used on sailing ships; colonial expansion and the establishment of a world-wide trading network would not have been feasible without hemp. Nowadays, ships' cables are usually made from wire or synthetic fibers, but scientists are now suggesting that the cultivation of hemp should be revived for the production of paper and pulp. According to its proponents, four times as much paper can be produced from land using hemp rather than trees, and many environmentalists believe that the large-scale cultivation of hemp could reduce the pressure on Canada's forests.

32) "According to its <u>proponents</u>, four times as much paper can be produced from land using hemp rather than trees." What does "proponents" mean?

- people who are against something
- **people who support something**
- people in charge of something
- none of the above is correct.

Every second, one hectare of the world's rainforest is destroyed. That's equivalent to two football fields. An area the size of New York City is lost every day. In a year, that adds up to 31 million hectares -- more than the land area of Poland. 37) In Islam, education is <u>compulsory</u>. Every must learn reading and writing. What does compulsory mean?

- **required**
- universal
- available
- everyone

38) The downtown shopping area is now a <u>pedestrian</u> zone-in other words. anyone can walk except cars. What does the word a pedestrian mean?

- an area for cars
- an area for kids only
- an area for workers only
- **an area for walkers**

39) The global economy crisis affects the <u>entire</u> world. What does the word

entire mean?

- Few
- No one
- **All**
- Never

40) Palestinians should determine their present and future. No one else can decide that. What does the word determine mean?

- Make a guess
- **Make a decision**
- Repeat
- Fly

41) When Sara was sick, her voice was almost <u>inaudible</u>. We couldn't hear what she was trying to say clearly.

- Very loud, easy to hear
- **Very soft, hard to hear**
- Very strong, uncommon
- Very shy, introverted

42) Each one of the students _____ the core of the educational process.

- **is**
- are
- were
- sometimes

43) We change the meaning of word (polite) into its opposite by adding the prefix _____

- Dis
- In
- Un
- **Im**

44) To change the word (thought) into adjective form, we add the suffix _____

- **ful**
- ly
- tion

- al

45) The Sociolinguistics class was rescheduled. _____ , everyone was depressed.

- because

- As

- Since

- **So**

46) The desserts tastes very well. _____ , we ate too much.

- **as a result**

- Because

- while

- When

47) We change the meaning of the word “possible” into its opposite by adding prefix:____:

- **im**

- in

- Dis

- Un

48) _____ will you leave? - Because/ I feel sick

- how

- what

- **why**

- when

49) _____ class do you prefer? English one.

- what

- whose

- **which**

- who

50) _____ did she say? she would not study tonight

- how

- who

- which

- **what**

51) _____ is your university? — It's very good

- **how**
- how often
- how far
- how long

52) _____ do Muslims pray a day? Five times

- how far
- how long
- **how often**
- when

53) The _____ place from Australia is Chile. It's on the other side of the World.

- farther than
- **farthest**
- farther
- farthest than

54) I don't think that your BMW car is _____ my Mercedes.

- faster
- **faster than**
- fastest than
- fastest

55) We add the prefix _____ to the word "regular" to change it into its negative meaning.

- **ir**
- ize
- ation
- cal

56) _____ car is that? - its Omar's.

- who
- which
- **whose**
- whom

57) _____ does it take you to land? 13 hours

- how often
- **how long**
- how far
- how

58) _____ is the Mall from your house? - 17 Kms

- how
- how often
- how long
- **how far**

59) I took some money from my bank account to buy some <u>groceries</u>. The I began to cook. What does groceries probably mean?

- **some food**
- a bad dream
- a cigarette
- a book

60) Some lasers are very <u>treacherous</u>, deadly. What does treacherous mean?

- exciting
- nice
- **dangerous**
- safe

61) Please stop <u>gossiping!</u> The exam has already started. What does gossiping probably mean?

- sleeping
- **talking**
- working
- typing

62) Arab people are <u>identical</u> to all people around the world because we are all humans. What does identical probably mean?

- different
- difficult
- **same**
- exactly the Opposite

63) Many Arab explorers <u>stirred</u> around the world. What does stirred probably mean?

- Stopped moving
- slept in the grass
- ate something
- **moved or traveled**

64) The word “decisive” is _____

- A verb
- **an adjective**
- an adverb
- a noun

65) We change the meaning of the word “agreement” into its opposite by adding the prefix...

- un
- in
- im
- **Dis**

66) If you suffer asthma, don't go to Mexico City. It is one of the ____ cities in the world

- polluter than
- more polluted
- pollute
- **most polluted**

67) The first adventurers to come to Canada were astonished by its vast _____

- wilding
- wildly
- **wilderness**
- none of the above

68) The moon is ____ the sun

- smaller
- **smaller than**
- The smallest

- The smaller

69) Babies can't <u>ingest</u> hard food because they have no teeth. What does the word ingest probably mean?

- **eat**
- biggest
- not engage
- not reject

70) My manager promised to <u>dispatch</u> letters of admission very soon but I have not received the letters yet. What does 'dispatch' mean?

- to travel
- **to send off**
- to work
- to delete
