Paragraph 1: Greg or Mendel was the first person to make precise observations about the biological mechanism of inheritance. This happened a little over 100 years ago in Austria, where Mendel spent his leisure hours performing experiments with pea plants of different types. He crossed them carefully and Look notes about the appearance of various traits, or characteristics, in succeeding generations. #### Paragraph 2: Mosquito

No matter who you are or where you come from, one thing is certain: you are acquainted with the mosquito although you probably wish you weren't. Mosquitoes are everywhere. They can be found all over the world, and they come in more than 2,500 species. Somewhere, at some time, you have surely met at least one. No one loves the mosquito. But unfortunately the mosquito may decide that she loves you. Yes, She. Only the female

mosquito bites. It's not because she's unfriendly: she needs blood to reproduce. Female mosquito is quite selective, and she chooses her victims carefully. First, she uses sensors to find her victim. With these sensors, she tests your body moisture, body warmth, and chemical substances in your sweat. If she likes what she finds, she bites. But if you don't appeal to her, she'll reject you for someone more appetizing. The next time a mosquito bites you, just remember that you were chosen. You're special. If the mosquito likes you, she settles onto your flesh very gently, and she breaks your skin with her proboscis tip. It's a kind of mouth and it sticks out just below the mosquito's eyes. She stabs the proboscis tip into your skin at once, and if she hits a blood vessel, she'll get a full dinner in about a minute. After that, the mosquito is tired. Heavy with your blood, she picks a spot---on a leaf or a stone---to lay her eggs. Just one drop of blood will produce hundreds of eggs.

## Practice

Look again at the reading “70 Brides for 7 Foreigners.”

Then answer the following questions. 70 Brides for 7

Foreigners

A Russia seems to be turning into a major exporter of brides. Almost 1,500 marriages with foreigners are registered in Moscow every year. Another 10,000 women go to the international marriage agency Alliance each year, according to a poll, and 23 percent of Russian mothers would like their daughters to marry foreign citizens. Russian brides have always been prized by foreigners ever since the time of Yaroslavl the Wise an eleventh-century grand prince of Kiev], whose daughter became the queen of France. But during Joseph Stalin’s time, the attitude toward marriages to foreigners was intolerant.

**B** In the 1960s, the registration of foreign marriages was resumed, and since then the trickle of Russian brides abroad has turned into a powerful torrent.

**C** Registration requires a passport and a guarantee from the groom's embassy that there are no obstacles to his getting married. The French embassy, for example, takes a very serious attitude toward marriages to foreign women. It requires that the French groom obtain certification of his "legal capacity for marriage." If an embassy official registers a couple that has not passed the requisite medical tests, the official is fined. Stiff requirements are also imposed by Germany.

**D** The Wedding Palace, the only place in Moscow that registers marriages to foreigners, requires confirmation that, in the given country, a marriage to a citizen of another state is valid. After all, in a number of countries a foreign wife and her children could find that they have no property rights. In Syria, for example, marriage to a foreigner is considered invalid without special permission.

**E** Many countries are trying to erect barriers to the marital migration from Russia. For example, one Moscow woman tried for nine months to get permission to go to the United States, where her fiancé was waiting for her. **F** Another couple wanted to get registered in Canada. The fiancé was called to the Canadian embassy for an interview, but an entry visa was never granted. “Prove that this isn’t a fictitious marriage,” they said

size = الحجم

It is difficult to really experience or feel the size of the united states .

من الصعب حقاً تجربة أو شعور بحجم الولايات المتحدة.

to get the full impact you should realize , for example that it takes 48 hours ( tow entire days and two long night ) to travel by train from chicago to los angeles , rolling along hour across wheat fields , mountains , and deserts

للحصول على تأثير كامل يجب أن تدرك ، علسبيل المثال انك تأخذ 48 ساعة (يومين كاملين وليلتين كاملتين ) للسفر بالقطار من شيكاغو الى لوسانجلس عابرا بحقول القمح ، والجبال والصحاري .

another way to think about it so to compare distances in the united states with the other more familiar to you .

بطريقة أخرى لنفكر حول المقارنه بين المسافات في امريكا مع غيرها الأكثر شيوعاً ومعرفة لديك.

for example New York to Washington , D.C. Is about the same as London to Paris or Nairobi to Mombasa to Tokyo to Kyoto , New York to Los Angeles is farther than Lisbon to Cairo or Moscow to Montreal or New Delhi to Rome

على سبيل المثال نيويورك الى واشنطن حوالي نفس المسافة من لندن الباريس او نيروبي الى مومباي الى طوكيو الى كيوتو ، نيويورك الى لوس انجلوس ابعد من lisbon الى القاهرة او موسكو الى مونتريال او نيودلهي الى روما

**climate = المناخ**

naturally , with such distances , the climate in the continental United State is also one of great extremes .

وبطبيعة الحال مع هذه المسافات , المناخ مناخ الولايات المتحدة قاري ومتناقض بشكل عظيم .
