<ol> <li>A compound is a word that contains</li> <li>One prefix and one word</li> <li>One suffix and one word</li> <li>Two root morphemes and one word</li> <li><u>Two words</u></li> </ol>	<ul> <li>remember telling</li> <li>Not to go</li> <li>NON-FINITE verbs include: Infinitives (the bare verb stem with no inflections such as the verbs coming <i>after</i>: <i>to</i>, must, should, and other modals).</li> </ul>
Compounding is a process of word formation in English which consists In combining existing <i>words</i> to create complex words.	Participles (verbs after 'have, has, had'). Gerunds (V + ing).
Compounding: It is the combination of <b>two or</b> <b>more</b> free morphemes.	<ul> <li>7) Identify the NON-FINITE verb in the sentence 'I recall him saying that he wanted to leave'.</li> <li>Want to leave</li> </ul>
<ul> <li>2) A compound is a word that contains</li> <li>One prefix and one word</li> <li>One suffix and one word</li> <li>Two root morphemes and one word</li> <li><u>Two root words</u></li> </ul>	<ul> <li>Want</li> <li>Wanted to leave</li> <li><u>To leave</u></li> <li>8) The FINITE verb in the sentence 'he enjoys reading at night to lull him to sleep' is:</li> <li>Lull</li> </ul>
A compound is a word that contains two or more <i>roots</i> .	<ul> <li>Reading</li> <li><u>enjoys</u></li> <li>to sleep</li> </ul>
<ul> <li>3) A compound is a word that contains</li> <li>One prefix and one word</li> <li>One suffix and one word</li> <li>Two root morphemes and one word</li> <li>Two free standing forms</li> </ul>	FINITE verbs: have tense and/or person and number inflections. 9) In the sentence 'Being such a shy person, he hated to meet people in cafes to chat', the FINITE verb is:
<ul> <li>4) The association between most words and their meanings is purely</li> <li>Controversial</li> <li>Conditional</li> <li>Central</li> <li>Conventional</li> </ul>	<ul> <li><u>Hated</u></li> <li>Being</li> <li>meet</li> <li>chat</li> </ul>
The associations between most words and their meanings are purely <i>conventional</i> .	<ul> <li>10) The mental dictionary that language users must be equipped with in addition to the grammatical rules of their language is called:</li> <li>Lexeme</li> <li>Diction</li> </ul>
<ul> <li>5) The association between the sound of a word and its meanings is purely</li> <li>Controversial</li> <li>Conditional</li> <li>Central</li> <li>Conventional</li> </ul>	<ul> <li><u>Lexicon</u></li> <li>Word-list</li> <li>A <i>lexicon</i> is the mental dictionary that language users must be equipped with, in addition to the grammatical rules of their language.</li> </ul>
3	
<ul> <li>6) Identify the NON-FINITE verb in the sentence 'I remember telling him not to go' is:</li> <li>Remember</li> </ul>	5 11) Function words include: Pronouns only

Syntax & Morphology – All Questions Types	Dr. Aljumarei 1437 2 <sup>nd</sup> term Twitter: @abual7arith 🛛 🖤
<ul> <li>Determiners only</li> <li>Conjunctions only</li> <li>Pronouns, determiners and conjunctions</li> </ul>	The largest unit of syntactic analysis Is the sentence.
Pronouns, prepositions, conjunctions,	Typically, sentences are made up of an NP (the subject) and a VP (the Predicate).
<ul> <li>determiners, demonstratives (e.g. this, those),</li> <li>certain adverbs (e.g. very &amp; not) and certain verbs</li> <li>(those with little or no meaning; e.g. be, must or</li> </ul>	These two phrases are grouped together by <i>Inflection</i> .
should) are some function parts of speech.	<i>I</i> (for short) is <i>the syntactic head</i> of a sentence. It stands for the Tense element of the sentence.
6	
<ul> <li>12) The inflection process turning 'go' into 'went' is called:</li> <li>Umlaut</li> <li>Ablaut</li> <li>Suppletion</li> <li>Conversion</li> </ul>	<ul> <li>The semantic head of a clause is T</li> <li>The semantic head of a clause is V+T</li> <li><u>The semantic head of a clause is V</u></li> <li>The semantic head of a clause is C</li> </ul>
Suppletion: it occurs when a morpheme is replaced by another which is extremely different	The SEMANTIC head of the sentence is the verb         EAT.
to mark a grammatical contrast. (Ex. <i>Go - went</i> and was - were.	8 16) A VSO language is a language such as:
<ul> <li>13) The inflection process turning 'sink' into 'sank' i called:</li> <li>Umlaut</li> <li><u>Ablaut</u></li> <li>Suppletion</li> <li>Conversion</li> </ul>	<ul> <li>French</li> <li><u>Arabic</u></li> <li>Chinese</li> <li>SOV (i.e. subject + object + verb) ; e.g. Japanese.</li> <li>SVO (i.e. subject + verb + object) ; e.g. English.</li> </ul>
Internal Change: a process that substitutes a non- morphemic segment to mark a grammatical contrast. (Ex. <i>sink - sank [ablaut]</i> , goose - geese	VSO (i.e. verb + subject + object) ; e.g. Arabic.
[umlaut]).	<ul> <li>17) In what way are SOV languages different from</li> <li>SVO languages:</li> <li>In SOV languages, complements precede their</li> </ul>
7 14) The syntactic head of a clause (IP) is:	<ul> <li><u>heads</u></li> <li>In SOV languages, complements follow their heads</li> <li>In SVO languages, complements precede their heads</li> </ul>
⊥ ■ V+I ■ C+I	<ul> <li>In SVO languages, complements are optional</li> <li>18) In SVO languages:         <ul> <li><u>complements follow their heads</u></li> <li>complements precede their modifiers</li> <li>complements precede their heads</li> <li>complements are optional</li> </ul> </li> </ul>
	<b>SOV</b> (Japanese): The complements <b>precede</b> their heads.
	<b>SVO</b> (English): All complements <b>follow</b> their heads.

<ul> <li>Syntax</li> <li>None of the choice</li> </ul>	19
<ul> <li>None of the above</li> <li>The <i>grammar</i> will have a finite (limited) number of rules, but will be capable of <i>generating</i> an infinite number of well-formed structures.</li> </ul>	<ul> <li>47) Each of the realizations of a particular morpheme is called:</li> <li><u>An allomorph</u></li> <li>A unit</li> <li>A form</li> </ul>
<ul> <li>44) is concerned with the biological basis of human language acquisition.</li> <li>Linguistic competence</li> <li>Language learning</li> <li>Generative grammar</li> <li>None of the above</li> </ul>	<ul> <li>A shape</li> <li>Each of the <i>realizations</i> (forms) of a particular <i>morpheme</i> is called an <i>allomorph</i>.</li> <li>48) An allomorph is one of the possible realizations</li> </ul>
<b>Generative grammar</b> is concerned with the <b>biological</b> / subconscious <b>basis</b> for the <b>acquisition</b> and use of human language, and the universal principles (laws) which constrain (make/control) the class of all languages.	of a: <u>morpheme</u> phoneme lexeme syntagmeme 49) The extreme form of allomorphy in which two completely different roots realize the same morpheme is referred to as:
17 45) e-mailer is an example of:	<ul> <li>Root morpheme</li> <li><u>Suppletion</u></li> <li>Morph</li> </ul>
<ul> <li>Backformation</li> <li>Prefixing</li> <li>Clipping</li> <li><u>Neologism</u></li> </ul>	<ul> <li>Base</li> <li>Suppletion is an extreme form of allomorphy in which two completely different roots (words) realize (are forms of) the same morpheme.</li> </ul>
When a word that does not exist in the lexicon is created through a morphological rule, we call it: <i>neologism</i> . (Example: <i>e-mailer</i> ).	50) Suppletion occurs when a word is represented by two or more roots.
If this neologism is used once and never again, we call it: occasionalism.	<ul> <li><u>Different</u></li> <li>Similar</li> <li>Both a and b</li> <li>None of the above</li> </ul>
18	<b>Suppletion</b> is a phenomenon whereby one lexeme
<ul> <li>46) The sentence 'Smith ate a sandwich' and 'a sandwich was eaten by Smith' are:</li> <li>Identical in the deep structure</li> <li>Different in the deep structure</li> <li>Identical in the surface structure</li> </ul>	is represented by two or more <i>different roots</i> , depending on the context.
<ul> <li>Identical in deep and surface structure</li> <li>The difference between these two sentences is in their surface structure (the syntactic form they take as English sentences), that is, one is an <i>active</i> sentence and the other is a <i>passive</i> sentence.</li> <li>However, at some less 'superficial' level, the two sentences are very closely related, even <i>identical, in the deep structure</i>; i.e. meaning.</li> </ul>	<ul> <li>51) The word 'had' in the sentence 'she had a baby' is:</li> <li>A grammatical word</li> <li><u>A content word</u></li> <li>A function word</li> <li>A class word</li> </ul>

Content words are words that have meaning in that they refer to objects, events and abstract concepts.

Content word Example

Nouns John, room, answer, table

Adjectives happy, new, large, grey

Full verbs search, grow, hold, have

Adverbs really, completely, slowly

Numerals one, thousand, first

Interjections eh, ugh, phew, well

yes/no answers yes, no (as answers)

Function words are closed class words.

Content words are open class words.

*Function* words, such as: Prepositions (of, at, in, without, by, between), Pronouns (he, they, anybody, it, one), Conjunctions (and, when, while, although, or), Modal verbs (may, must, should, can, must, ought, need), Auxiliary verbs (Be [am, is, are], *have*, do), Particles (no [e.g. no one] not, nor, as).

Nouns (John, room, answer, table), Adjectives (happy, new, large, grey), Full verbs (search, grow, hold, have), Adverbs (really, completely, slowly), Numerals (one, thousand, first), Interjections (eh, ugh, phew, well), yes/no answers (yes, no [as answers]).

# 52) The word 'had' in the sentence 'He had a shower'

- is:
- A grammar word
- A lexical word
- A function word
- A class word

21

# 53) 'Have, has, had' are all:

- Modals
- Lexemes of the word HAVE
- Phrasal verbs
- Word-forms of the lexeme HAVE

A lexeme: is a dictionary word that can be realized by word-forms. The word-form is the orthographic or phonological shape in which a lexeme occurs.

Examples:

'am, are, is, was, were, be, been, being' are wordforms of the lexeme 'BE'.

'have, has , had' are word-forms of the lexeme 'HAVE'.

'do, does, did, done, doing' are wordforms/realizations of the lexeme 'DO'.

'Wife' and 'wives' are word-forms of the lexeme 'WIFE'.

'Small, smaller, smallest' are realizations of the lexeme 'SMALL'.

# 22

- 54) Which of the following illustrates 'compounding':
- Wallpaper
- AD.
- UN
- E-mailer

Compounding is the combination of two or more free morphemes.

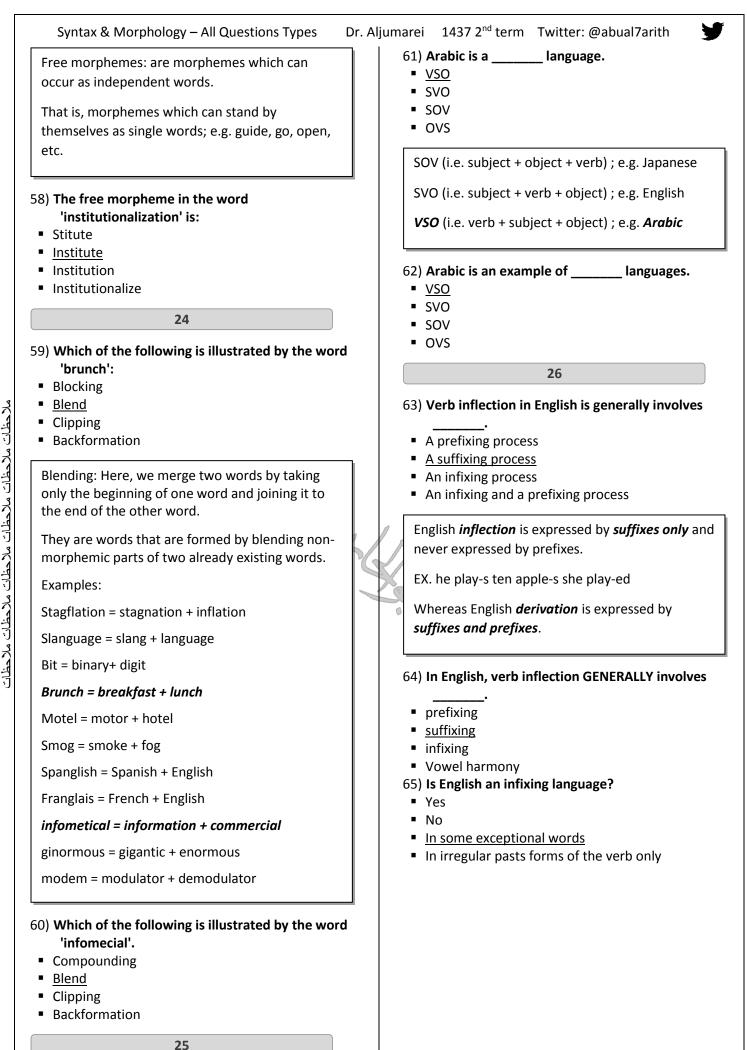

Example: Girlfriend, chalk dust, undergrowth, blackbird, offload, seasick.

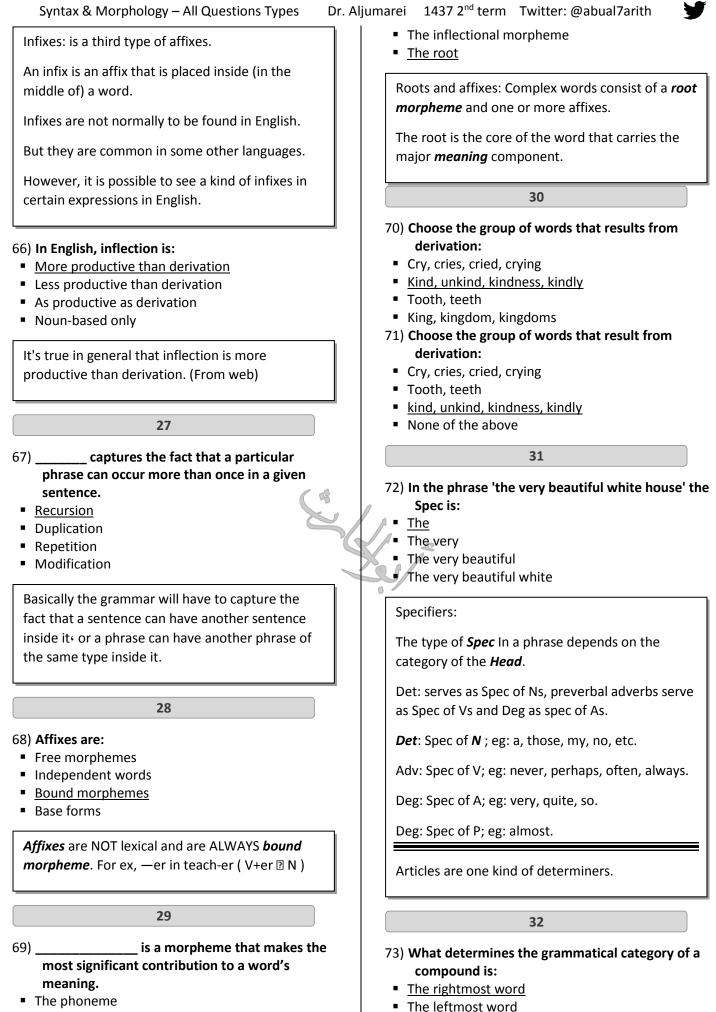

55) Which of the following illustrates 'compounding':

- Football
- Prep-school
- NATO
- E-commerce
- 56) \_\_\_\_\_ is an example of compounding:
  - Wallpaper
- Ad
- UN
- All the above

23

- 57) The free morpheme in the word 'independent' is:
  - Independ
- Dependent
- Depend
- Indep

The derivational morpheme

The rightmost and the leftmost words together

Syntax & Morphology – All Questions Types

Neither the rightmost nor the leftmost word

The rightmost word determines the *category of the compound*.

#### 33

- 74) Which of the following is an allomorph of the English plural morpheme {S}:
  - [s] after [t], [k], [p] as in 'bits, tips, tacks'
  - [iz] after sounds like [s], [z] as in 'sneezes, bosses'
  - [z] after [d], [g], [n] as in 'dogs, pads, hens'
  - [s], [z], and [iz]

Allomorph: one possible form of a particular morpheme, the forms /s/ z/ and iz in cats, dogs and horses are allomorphs of the plural ending s.

# 75) One of the following is NOT an allomorph of the plural morpheme {S} in English:

- [s] after [t], [k], [p] as in 'bits, tips, tacks'
- [iz] after sounds like [s], [z] as in 'sneezes, bosses'
- [z] after [d], [g], [n] as in 'dogs, pads, hens'
- [en] as in 'oxen' and 'children'

34

#### 76) Yes/No Questions in English are derived by means of:

- I to C
- V to I to C
- Neither \*
- I to Spec of CP
- 77) The derivation of a Yes/No Question in English of the movement of:
  - V to Spec of IP
  - <mark>خطأ | V to ا</mark>
  - I to C
- V to Spec of CP
- 78) In French, Yes/No Questions are derived by the application of:
  - V to I to C
  - V to C
- I to V to C
- V to Spec CP

#### V-to-I applies in French, but not in English.

I- to - C exists in both French and English

V- movement to I exists in French, which fact explains the existence of V- to - I - to - C in this language.

V- movement , except with BE and HAVE used as main verto- I does NOT exist in English, which fact explains why English does not have V - to- I- to – C

In (3) Infl has moved to C in both languages giving rise to well-formed Yes/No questions. In (4a), the verb in *V* seems to have moved to *I* then to *C* in *French*, while in *English it cannot* do so.

#### 35

79) 'A recent history book about Morocco' is:

- AP
- VP
- <u>NP</u>
- PP
- 80) 'An interesting book' is:
- <u>NP</u>
- P
- VP ■ PP.<sup>©</sup>
- 81) In the following string '<u>a very intelligent</u> student' the underlined words make up a(n):
- AP
- ADV P
- NP
- PP

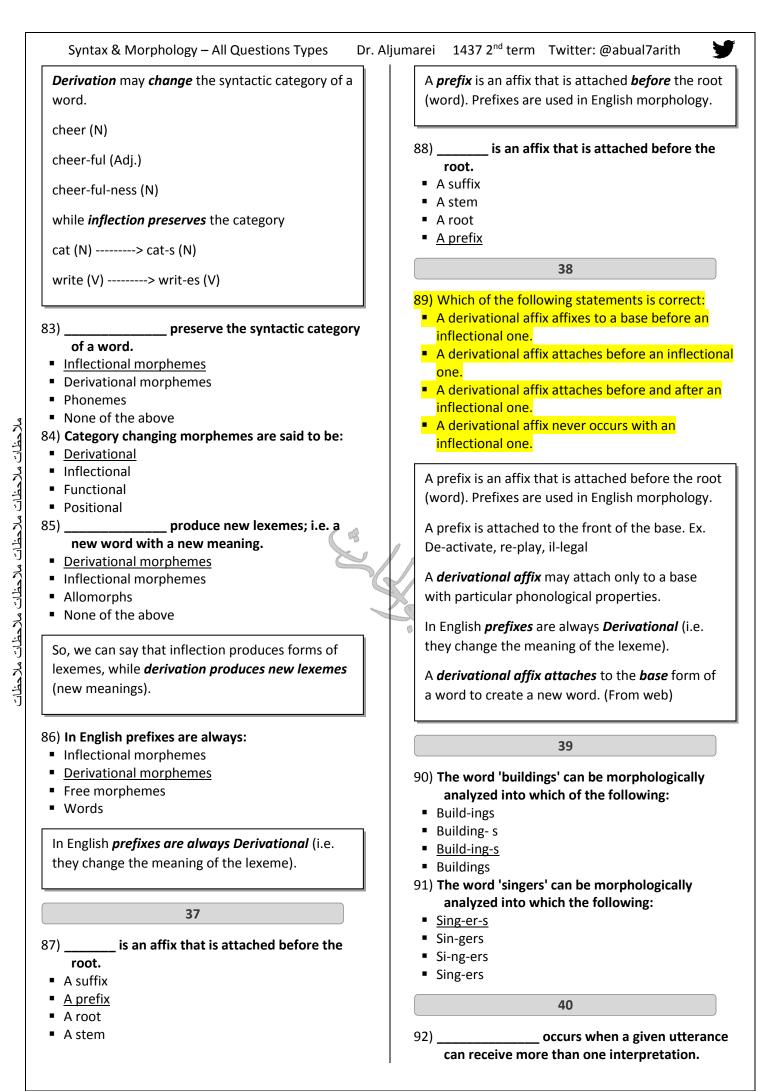

36

- 82) \_\_\_\_\_ do not change the syntactic category of a word.
  - Derivational morphemes
  - Inflectional morphemes
  - Phonemes
  - Allomorphs

<ul> <li><u>Calculate</u></li> </ul>	Creat-ive: Derivational.
42	play-ed: Inflectional type.
96) UNICEF illustrates:	Hanni-ness: Derivational
<ul> <li>An acronym</li> </ul>	Happi-ness: Derivational.
<ul> <li>A blend</li> </ul>	
<ul> <li>An example of clipping</li> </ul>	45
<ul> <li>An example of backformation</li> </ul>	100) The lexicon lists:
	<ul> <li>Simple words</li> </ul>
	<ul> <li>Complex words</li> </ul>

words, affixes and constituents

The lexicon contains more than words. For example, affixes, such as '-er' can be assumed to be in the lexicon.

Constituents = components.

#### 101) The lexicon contains:

- Words only
- Affixes only
- Complex language forms only, e.g. affixed inflected forms
- words, affixes and complex language forms

## 102) The lexicon is a:

- Mental dictionary
- Dictionary
- Glossary
- Word-list

A lexicon is the mental dictionary that language users must be equipped with, in addition to the grammatical rules of their language.

## 103) Lexical words include:

- Pronouns
- Determiners
- Conjunctions
- Words with lexical of dictionary meaning

Function words include: Pronouns, prepositions, conjunctions, determiners, demonstratives (e.g. this, those), certain adverbs (e.g. very & not) and certain verbs (those with little or no meaning; e.g. be, must or should) are some function parts of speech.

Content words are words that have meaning in that they refer to objects, events and abstract concepts.

#### 46

- 104) The sentence "She drank the juice in the kitchen" has:
  - Two distinct deep structures
  - Two identical deep structures
  - Two surface structures
  - One deep and one surface structure
- 105) The PP 'in the kitchen' in the sentence "In the kitchen, she drank her coffee" is:
  - Modifier
  - Adverbial
  - Ambiguous

- Dr. Aljumarei 1437 2<sup>nd</sup> term Twitter: @abual7arith
  - Prepositional

#### 47

# 106) The word 'Assembly' has:

- One morpheme
- Two morphemes
- Three morphemes
- Four morphemes

#### Examples:

Over-estimat-ion / dis-pleas-ure / nerv-ous

One morpheme boy (one syllable)

desire, lady, water (two syllables)

crocodile (three syllables)

Two morphemes boy + ish desire + able

Three morphemes boy + ish + ness desire + able + ity

Four morphemes gentle + man + li + ness un + desire + able + ity

More than four un + gentle + man + li + ness anti + dis + establish + ment + ari + an + ism

# 107) The word 'Establishment' has:

- One morpheme
- Two morphemes
- Three morphemes
- Four morphemes

establish + ment

#### 108) The word 'Constitution' has:

- One morpheme
- Two morphemes
- Three morphemes
- Four morphemes

109) How many base forms are there in the following word 'restructuring'?

- One
- Two
- Three
- Zero
