Lab 4
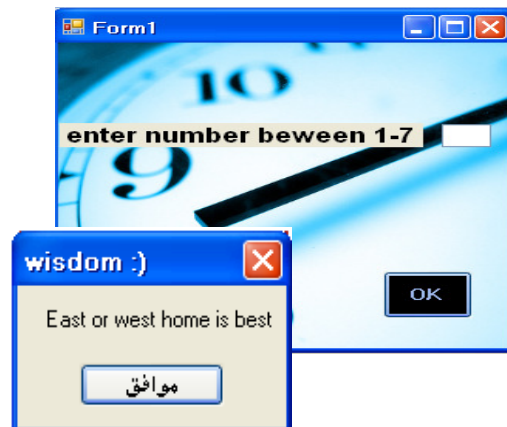

VB.NET MessageBox.Show Examples

You want to use the **MessageBox.Show function** in your VB.NET program that targets the Windows Forms application framework. The MessageBox.Show function immediately displays a dialog box in the interface and you can specify buttons, default buttons, an icon, and some other properties of the dialog. Here we look at a program text that has examples of the MessageBox.Show function being used in different ways, using the VB.NET language.
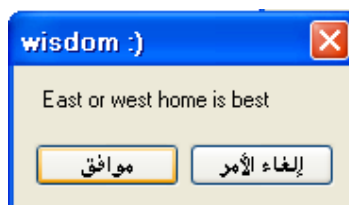

Exercise

By visual basic ,Design & Write code to a program that allows the user to input number between 1-7 in the text box and then press OK button to show you the appropriate wisdom by message box.
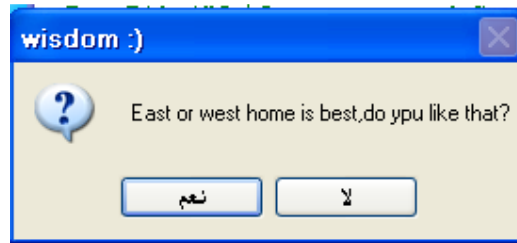

1. **Easy come easy go.**
2. **East or west home is best.**
3. **Even homer some times nods.**
4. **Forbidden fruit is sweet.**
5. **Four eyes see better than two.**
6. **God helps them who help themselves.**
7. **All is well that ends well.**

- Show the message box with OK & Cancel buttons .

- Show the message box with question " Do you like wisdom?"
  ,Yes/No buttons & question icon .

wisdom :)

(?) East or west home is best,do ypu like that?

[نعم] [لا]

Homework:

Add the exit button and write its code that the user presses the button and it displays the message box "Are you sure you want to exit" with appropriate buttons & icon ?

```
Dim result3 As DialogResult

        result3 = MessageBox.Show("are you sure that you want to exit?", _
          "The Question", _
          MessageBoxButtons.YesNoCancel, _
          MessageBoxIcon.Question, _
          MessageBoxDefaultButton.Button2)
        If result3 = Windows.Forms.DialogResult.Yes Then End

    End Sub
```

Lab 5+6

By visual basic ,Design & Write code to a Program, which helps the user to find the amount of Zakat and allow the user to enter the number of months then verification that the money remain for the <u>one year</u> ,by inputting the amount of money (M) the program does the following :

- By using inputbox, Make the program asks the user to enter his name.
- By message .show , make the program displays a welcome message+ user name.
- Find the amount of Zakat..
- In case of absence of a condition shown to the user a message that this money should not be the Zakat ,thank you !!!!
- Recommended that the form contains exit and clear button.
- We will trying to use Buttons and symbols appropriate.
- Rewrite the code to the Exit button to show a confirmation of his desire to close the program.
- Zakat= (money*.25)/10
- At running time set the form to be shown in the maximum state.
- Set the anchor property to all form object.
