

حل السؤال 1: 1- انشئي مشروع من نوع console application

1 - قومي باضافة فئة جديدة (class) ثم قومي بكتابة مايلي:

```

Public Class shapes
    Public Overloads Sub drawline()
        Dim i As Integer
        Console.WriteLine("first method")
        For i = 0 To 20
            Console.Write("*")
        Next
        Console.WriteLine()
    End Sub
    Public Overloads Sub drawline(ByVal n As Integer)
        Dim I As Integer
        Console.WriteLine("second method")
        For i = 0 To n
            Console.Write("*")
        Next
        Console.WriteLine()
    End Sub
    Public Overloads Sub drawline(ByVal n As Integer, ByVal ch As
Char)
        Dim I As Integer
        Console.WriteLine("third method")
        For i = 0 To n
            Console.Write(ch)
        Next
        Console.WriteLine()
    End Sub
End Class

```

2- (قومي بكتابة مايلي: module: في صفحة ال)

```

Module Module1
    Sub Main()

        Dim shapobj As New shapes
        shapobj.drawline()
        shapobj.drawline(10)
        shapobj.drawline(15, "_")

    End Sub
End Module

```

للتشغيل اضغط ctrl+F5
